

BobCAD-CAM: A sign that times are changing...

BobCAD-CAM, Florida based CAD-CAM developers are actively revolutionizing the sign making industry by providing powerful and affordable methods of engraving, embossing, nesting and allowing sign makers around the world to create their g-code programs the easy way! New engraving features allow you to use fonts for engraving, projecting onto surfaces and more. The new BobART PRO-X system addition allows you to take a picture and create a relief model directly from it and turn it into 3D machine toolpath fast. Easy to use Raster to vector features allow you to turn images and pictures into 2D profiling toolpath as well. With the release of their new Nesting addition, you can optimize material and get the most out of your money. You can visit them on the web at [www.bobcad.com](http://www.bobcad.com) for free demo programs or simply call them directly at 877-262-2231.
